

## Low voltage with high power!

The **Rollex Motor Roller Type 840** has specially been developed for the use in continuous and zero pressure systems for transporting small container and cardboard boxes. It combines modern technology and reliable individual components to a matured product.

Motor Type:	brushless motor (integrated commutation electronic)
Voltage:	24VDC
Power Torque:	40W
Torgue:	up to 1,8Nm
Speed:	0,2 to 1,3m/s (depending on the version)
Nominal Current:	2,5A

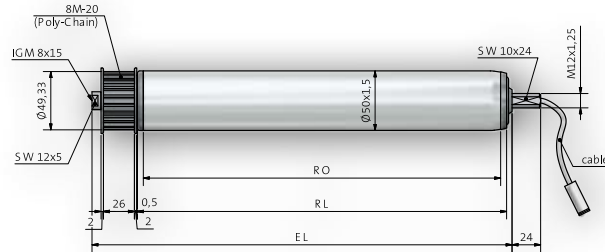

The Motor Roller will be steered and connected via an external Control Box. Speed and rotation direction can be set by a rotary switch.

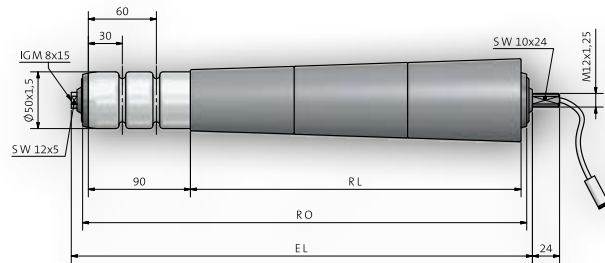

The **Rollex Motor Roller Type 840** can be combined with several driving elements from the Rollex - Product Range.

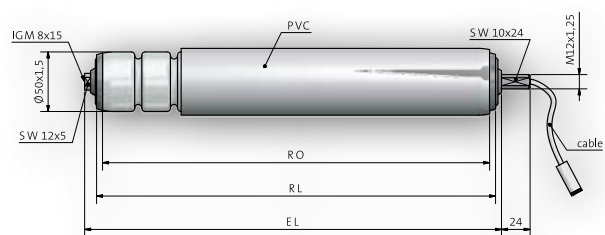

### Example Tooth Belt Drive

### Example Conical Roller

If required the Motor Roller can even be coated with PVC-Hose
